# Cyber Resilience

PREPARE

WITHSTAND

RECOVER

ADAPT

# Why Cyber Resilience Matters

Trust in digital systems

Protecting people and  
economies

Leadership  
responsibility

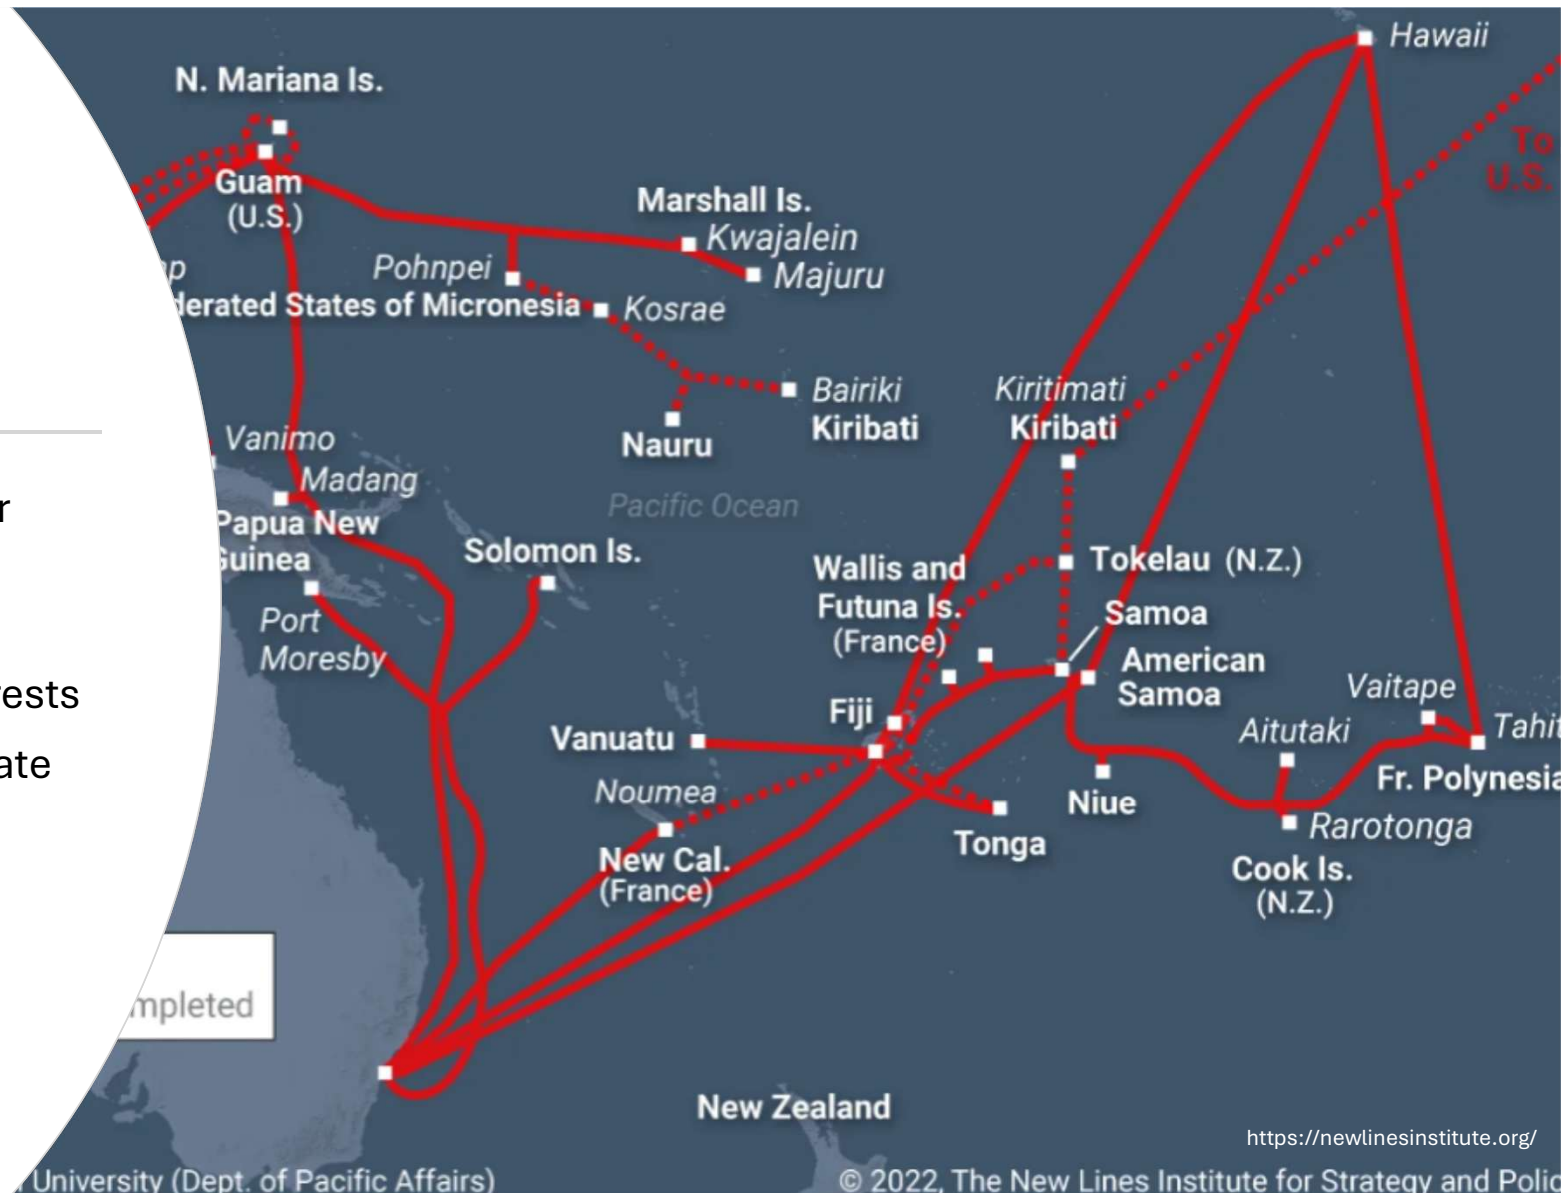

## The Pacific Digital Landscape

- Fast digital adoption
- Government, banking, tourism, healthcare online
- Challenges:
  - Geography
  - Small workforce
  - Limited resources

## Geopolitics in the Pacific

- Strategic digital frontier
- Undersea cables & satellites = critical
- Competing global interests
- Cyber operations by state actors

# The Iceberg Effect

# The Evolving Threat Environment

Cybercriminals

State-linked actors

Global attacks with  
local impact

# The Evolving Internal Threat Environment

AI

Creating Complex  
Environments

Security an  
afterthought

Lacking cybersecurity  
strategy

## Building Blocks of Cyber Resilience

---

- Governance & Leadership
- Preparedness & Planning
- Partnerships & Collaboration
- Capacity & Awareness
- Resilience in Practice

## Pacific Opportunities & Initiatives

- Fiji's National Cybersecurity Strategy 2025–2030
- Laqatoi Declaration (Pacific wide cyber plan)
- Budapest Convention on Cybercrime
- Australia - Fiji partnership

# Cyber Resilience Leadership Takeaways

Cyber is a business issue

People, processes,  
partnerships > tech alone

Think resilience, not just  
protection

---

## Closing Reflection..

If a cyber incident happened tomorrow,  
how ready is your organisation to keep  
operating and retain trust?

# Uplift your Cyber. What Can you do on Monday?

COMMIT TO  
AWARENESS

CHECK YOUR  
RESILIENCE

TEST YOUR  
READINESS

KNOW YOUR THREAT  
LANDSCAPE

# Uplift your Cyber. What Can you do on Monday?

CYBER HYGIENE  
TRAINING FOR STAFF

DO YOUR BACKUPS  
REALLY WORK?

WHEN WAS THE LAST  
IR EXERCISE? NO IR  
PLAN? BUILD ONE

RUN A PENETRATION  
TEST

Thank you..
