Let's talk about Possibilities...

The Pacific Network Reality: A Familiar Story

- The "IT Person" wears 10 different hats.
- Expensive site visits for simple fixes
- Inconsistent performance across different branches or locations.
- Constant worry about security threats and data protection.
- Multiple systems from multiple vendors that don't talk to each other.

Familiar Stories across the room and in Fiji

More so, in Small & Mid Sized Businesses

Days of our Lives

**Complexity
isn't just an
inconvenience.
It's a hidden
tax on your
business.**

The 3 Pillars of a Modern Network

SIMPLICITY

- Radically easy to manage, from anywhere.

VALUE

- Delivers powerful features without breaking the bank.
- Lowers total cost of ownership.

RESILIENCE

- Secure, reliable, and built to withstand local challenges.

Introducing

Omada

by tp-link

About

- Founded in 1996, TP-Link is a global provider of reliable networking devices and accessories, involved in all aspects of everyday life. The company is ranked by analyst firm IDC as the **No. 1 provider of Wi-Fi devices for a consecutive 12 years***, supplying distribution to more than 170 countries and serving billions of people worldwide.
- With a proven heritage of stability, performance, and value, TP-Link has curated a portfolio of products that meet the networking needs of all individuals. Now, as the connected lifestyle continues to evolve, the company is expanding today to exceed the demands of tomorrow.

Introducing Omada: The Platform Built Simplicity

Omada: A Unified Cloud-Managed Platform for networking and surveillance.

- **One Platform, One Dashboard:** Manage your Switches, Wi-Fi Access Points, and Gateways, cameras, NVRs, Solar Power Systems together.
- **Built for Simplicity:** Control your entire network from any web browser or mobile app, from Cloud-Based Controller and on-premises controller with full cloud access
- **Delivered by Bondwell:** The right technology, supported by local expertise you can trust.

How Omada Delivers SIMPLICITY

100% Centralised Management

Configure, monitor, and troubleshoot your entire network from anywhere with an internet connection.

Zero-Touch Provisioning

Ship a new device to a remote site. As soon as it's plugged in, it automatically downloads its configuration from the cloud. No IT staff needed on-site.

Intuitive Interface

Designed for the business owner, not just the network engineer.

How Omada Delivers VALUE

No Mandatory Subscription or Licensing Fees

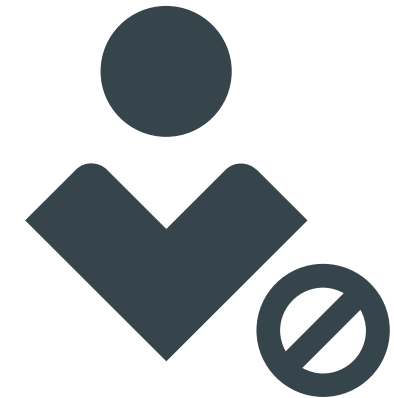

You own the hardware, you own the system. The powerful management software (hardware controller and software controller) is free to use.

Free Cloud Controller

No need to buy and maintain an expensive on-site server to run the network.

Cloud access by hardware controller and software controller is free. For cloud-based controller, Essentials (free of charge) and Standard version (need to pay for license)

Drastically Reduced Operational Costs

Eliminates the need for most on-site visits, saving thousands in travel and time.

How Omada Delivers RESILIENCE

AI-Driven Network Optimisation

Automatically analyses the network environment and adjusts Wi-Fi channels and power to ensure the best performance.

Advanced Security Suite

Built-in enterprise-grade firewall, powerful VPN capabilities, and robust traffic rules to protect your data.

High-Availability Features

Seamlessly handles device failures and ensures your network stays online.

Secure Guest & Corporate Networks

Easily create separate, isolated networks to protect your business data from public Wi-Fi users.

Scenario 1:

The Multi-Branch Retailer's

The Challenge: Deploying a consistent and secure Guest Wi-Fi and Point-of-Sale network across all locations.

- **The Omada Solution:**

- A single IT manager in Suva configures and deploys the network policies to all stores with a few clicks.
- Monitors all network traffic and device health in real-time from one dashboard.
- When a new store opens, hardware is shipped, plugged in, and is operational in minutes.

Result: Faster deployment, lower cost, consistent user experience.

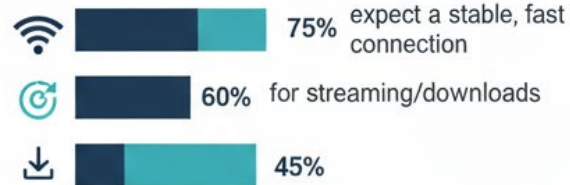

Scenario 2:

Resort / Hotel

- **The Challenge:** Providing fast, reliable Wi-Fi for guests and operations when the nearest IT expert is hours away.
- **The Omada Solution:**
 - Wi-Fi access points are managed remotely from the cloud.
 - The resort manager gets an alert on their phone if an access point goes offline.
 - Bondwell support can remotely diagnose and often fix issues without ever stepping on a boat.
 - Create premium Wi-Fi packages for guests as a new revenue stream.
- **Result:** Happier guests, lower support costs, empowered local staff.

Introducing

UNIQUE KITS

Our Story: Artistry in Hand, A Culture in Mind.

In Fiji, art is not just something you look at. It is something you feel. It's a story, a legacy, a language spoken through intricate patterns and heartfelt creation. This is the spirit of Masi—a tradition that has carried our identity for generations.

We are driven by a passion to see Fijian creativity celebrated on the global stage. Not in a gallery, but in daily life. On your desk, in your travel bag, a part of your routine. We create premium, limited-edition IT accessories that are more than just functional tools—they are **conversation starters**. Each design is a piece of home, an invitation to share a story, a bridge between cultures.

At Bondwell, we asked a bold question: What if we could take this spirit and place it in the hands of the world? What if the technology that connects us globally could also be a canvas for the art that defines us locally?

This is the vision behind **Unique Kits**.
